

Our Allura Fiber Cement Lap Siding has a Cedar premier finish to match your home's style.

Our Cedar Lap siding is manufactured to look like natural wood in various exposures. Our authentic woodgrain appearance is achieved with our advanced first-transfer system using real cedar boards to impose the print. Our grain pattern repeats every 48 planks, which is the best in the industry. This means on a 20x24-foot wall, Allura's planks will only have a maximum of two repeats. Previous survey results prove that 2 out of 3 consumers prefer the woodgrain appearance of Allura products over the competition.

- Sustainable and Durable
- Designed and tested to withstand hurricane-force winds
- Pre-primed and sealed for painting after install
- Low maintenance alternative to wood
- Virtually maintenance free
- Designed with advanced technology to resist wood-boring insects and rotting
- Industry leading [50-Year Warranty](#)
